

**weisstechnik**<sup>®</sup>  
a schunk company

We see a bright  
Weiss future.  
Everything  
stays better.

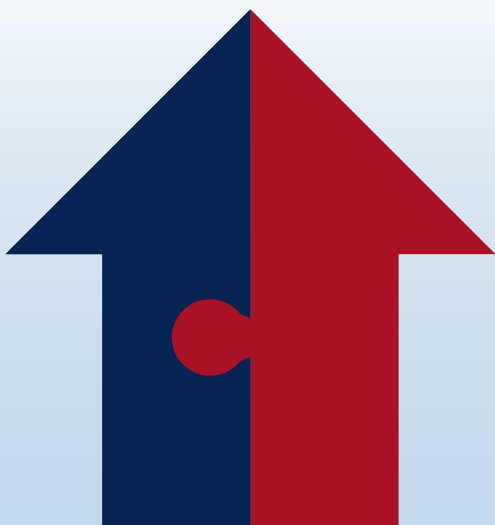

# Now growing together.

## **What has belonged together for a long time.**

Weiss Umwelttechnik GmbH and Vötsch Industrietechnik GmbH are merging to form Weiss Technik GmbH in 2021. After being together for 25 years, it really is about time.

We offer you the most comprehensive product portfolio in the world. Together. It is precisely this common strength that we now project outwards, as a visible one-firm strategy, through a unified company name: Weiss Technik GmbH.

The merger is a purely administrative measure which has no influence on strategy, products, service and staff. The exciting history of both companies will be continued.

# Strong for the best solution.

## **We are joining forces.**

This brings numerous advantages for everyone. You will benefit from the consistency and reliability of an innovative and healthy company that continues to offer you integrated solutions from a single source. In addition, the change of name allows us to streamline processes for more efficiency - and for a safe future. That is good for us and good for you.

## **Everything stays the same, only the name changes.**

It goes without saying that your personal contact will still be there for you. And all products are available as before. Because we want you to be and remain satisfied customers. After all, it's only the name that's changing.

From now on  
all under  
one roof:

**Weiss Technik GmbH**

# Success is created together.

That's exactly what we notice when we work as a team to develop the best solutions, and generate ideas together.

## It started with a suitcase.

### **Always looking to the future.**

From the outset, Karl Weiss focussed on new ideas and innovations. With his "Hygrorekord", an electric rapid moisture analyser, measurements could be done quickly and reliably for food, wood, paper and textiles. Its precision and mobile application possibilities turned "the suitcase" into an "economic miracle à la Weiss" in just a few years.

Even today, Weiss grows with new ideas to meet the needs of customers and continually expands the portfolio through strategic acquisitions and own developments.

# From refrigerated displays to a centre of excellence.

## Successful by tradition.

A good 90 years ago, Ernst Vötsch founded his company for the production of refrigerated displays in Berlin. At the time, no one suspected that he was also laying the foundation for a unique brand that is justifiably considered the inventor of environmental simulation.

Today, the Balingen site is still the centre of excellence for standard test equipment and customised test equipment. Always closely associated with the precision, inventiveness and reliability that distinguished the company even in its early years.

# We measure ourselves by our service!

The high qualification of our employees is the basis for excellent service: they are specialists, qualified in accordance with the latest guidelines for occupational electrical safety and environmental protection and are authorised to carry out all service work professionally. Since January 2016, the Weiss and Vötsch service team has been successfully operating under the name Weiss Umwelttechnik GmbH - from now on, the new name is Weiss Technik GmbH.

**24/7-Service-Helpline:  
+49 1805 666 556**

## **Our services - lots of good reasons:**

- Global service network
- Wide selection of preventive maintenance
- Reliable spare part supply
- Special deployments available any time
- Certified proper disposal of outdated devices

Our Service Experts are always near you.

For a  
safe future.

**We test tougher than nature.**

Safety is a question of technology. To test products and materials, we simulate environmental conditions. From blazing hot to freezing cold. From soaking wet to dust dry. In fast motion and on the move under maximum stress.

We bring the whole world into test laboratories and test spaces. Our environmental simulation systems help to make products safer. For every purpose.

**Always the exact temperature.**

Process safety needs optimum temperatures. Our Heat Technology guarantees precise heat treatments. Degree by degree.

We offer turn-key solutions from a single source with a unique service network. For customers from all industries with a wide range of different requirements. You can rely on that. Always and everywhere. For a safe future.
